ARTIFICIAL TURF & PUTTING GREENS

In May 2014 with construction oversight from Tom Buchanan in our Dirigo Pines Maintenance Department, we began work on our new putting green. The ground work began in earnest with staff and residents getting involved in the process; 91 year old Floyd was on the compactor for several days helping to prepare the ground for your bentgrass artificial turf product. The weather was good and we made great progress. Residents, staff, and families were excited about the prospect of the putting green; 99 year old Marion was practicing in her room putting into a glass in preparation for the opening.

Now over a month after our bentgrass green has opening, "Piney Knoll Putting Green" is used on a daily basis. There are the early morning walkers who stop by at 6 AM to putt, some of our staff taking a few putts during lunch, also our after dinner group gets in a little game. On the weekends, the residents set up their own putting tournaments.

Many residents can no longer golf on the local courses due to physical constraints, but putting is still a reality. This is one of the best additions that we could have made to our community. We thank you for your great product and assistance in bring such a great feature to Dirigo Pines Retirement Community.
